## **DETAILED ACTION**

### ***Specification***

The abstract of the disclosure is objected to because it exceeds 150 words.  
Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 1 and 19, and all claims that depend therefrom, these claims are indefinite for the following reasons:

1) the preamble of the Claim recites "limiter optics for an ignition feedback regenerative free electron laser amplifier..." without the necessary structural elements and structural cooperative relationships recited within the body of the claim to support;

2) it is unclear/vague what structure/structural cooperative relationships in the specification the Applicant is referring to with regard to "a pickoff means for...". Please provide specific information regarding where in the specification this "means for" clause refers.

3) the Applicant has claimed a "focus assembler for...". It is unclear/vague what structure/structural cooperative relationships this refers. It is recommended that the Applicant use a "means for" clause to include the structure of the specification. In

addition, the Applicant needs to specify where in the specification this "means for", if added, refers.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Sheffield (US 5960013).

Sheffield discloses an ignition feedback regenerative free electron laser amplifier having a pulsed output beam of predetermined duration from an undulator (38) comprising:

a pickoff means (44) for directing a portion of the output of said pulsed output beam as a pickoff beam (52); and

a focusing assembler (48)(42) for bringing said directed pickoff beam to a focus at a selected point (Fig. 2) within said undulator at a selected time;

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey N Zahn whose telephone number is 703-305-3443. The examiner can normally be reached on M-F: 8:30-5:00 pm.
